Career Objective

Enthusiastic Computer Science undergraduate with a strong foundation in front-end development, eager to apply technical skills to real-world web development projects. Proficient in HTML, CSS, JavaScript, Bootstrap, and responsive design, with a keen interest in creating user-centric and visually engaging web applications. Quick to learn new technologies and committed to continuous growth as a developer.

Skills

Languages: JavaScript

Frontend Development: HTML5, CSS3, Bootstrap

Database Management: MySQL

Version Control: Git, GitHub

Education

Malla Reddy Engineering College

08/2023 – 06/2027 | Hyderabad

B.Tech in Computer Science and Information Technology

CGPA : 8.5

Certificates

- JavaScript (HackerRank Skill Certification, 2025) [↗](#)
- CSS (HackerRank Skill Certification, 2025) [↗](#)

Projects

Ecommerce Clone [↗](#)

- Developed a fully responsive **e-commerce front-end clone**, replicating core features of modern shopping platforms.
- Designed and implemented **dynamic product listings**, **category-based navigation**, and **interactive UI components** (e.g., search bar, carousel, product cards).
- Focused on **real-world e-commerce UI patterns** to demonstrate understanding of industry design standards and web development best practices.

College Result Website [↗](#)

- Developed a **responsive web application** to display **academic results** using **HTML**, **CSS**, and **JavaScript**.
- Implemented **client-side form validation** and **DOM manipulation** for dynamic and interactive **input handling**.
- **Deployed the application via GitHub Pages**, ensuring easy accessibility and version control.
