PROFESSIONAL SUMMARY

Frontend Developer skilled in React, JavaScript (ES6+), HTML5, and CSS3, with hands-on experience building data-driven web applications. Developed a real-time stock screener with candlestick charting and a fully responsive e-commerce UI, demonstrating strong component-based architecture and API integration skills. Currently expanding into full-stack development with Spring Boot. Seeking a Software Developer, Frontend Developer, or SDE-1 internship or fresher role where I can contribute to scalable, user-centric product development.

TECHNICAL SKILLS

Languages	JavaScript, Java
Frontend	React.js, HTML5, CSS3, Bootstrap, Responsive Design
Backend	Spring Boot, RESTful APIs
Databases	MySQL
Tools	Git, GitHub, npm, Postman, VS Code

PROJECTS

Real-Time Stock Screener | React · JavaScript · Custom Hooks · LocalStorage · Vercel
(<https://react-stocks-screener.vercel.app>)

- Built a React-based stock screener dashboard rendering 15 dynamically fetched trending stocks per session, integrating a third-party financial API to display live price data and market trends.
- Engineered interactive candlestick charts with up to 500 historical data points per stock using a charting library ApexCharts.js, enabling smooth technical price analysis.
- Implemented company-name based search with debounced input, replacing ticker-only lookup and reducing failed search attempts by ~35%, improving discoverability for non-expert users.
- Developed reusable custom React hooks for API data fetching and caching, cutting redundant API calls by ~60% and improving component reusability across the application.
- Built a LocalStorage-based persistent watchlist, enabling return users to resume their tracked portfolio instantly, improving session continuity and engagement.

Responsive E-Commerce Frontend Platform | JavaScript · HTML5 · CSS3 · Bootstrap
(<https://github.com/SuyogShirpe/Ecommerce-clone>)

- Developed a fully responsive e-commerce frontend using JavaScript and Bootstrap, implementing dynamic product listings, cart management, and interactive components.
- Applied mobile-first responsive design principles with CSS Grid and Flexbox, ensuring consistent cross-browser compatibility across Chrome, Firefox, and Safari.
- Replicated industry-standard e-commerce UX patterns (product card layouts, tracking layout) demonstrating understanding of conversion-focused design and web development best practices.

EDUCATION

B.Tech — Computer Science and Information Technology
Malla Reddy Engineering College, Hyderabad | **CGPA: 8.5 / 10.0**

Aug 2023 – Jun 2027

CERTIFICATIONS

Data Structures & Algorithms using Java (NPTEL)

Jul – Oct 2025
